Dear Prospect,

Unique 32 hour *Level I Thermography Course*.

**First 16 hours are done on-line**

**Balance of the course is done in two days of in-class training**

We will discuss infrared theory, heat transfer concepts and learn the correct operation of your thermal imaging equipment.

Learn how to take quality thermal images that are clear, concise and easy to interpret.

Learn tested ideas in setting up a successful thermal program within your facility or at your customers' locations.

**Cost of the class is \$1,695.00.**

### **Register Now!**

**Register through your Fluke Distributor.** Payment is due prior to the start of class. All moneys will be returned if the class is cancelled for any reason. 15% will be withheld if a student cancels within 15 days of the start of class and all material received must be returned.

**The course is open to everyone regardless of whether or not they own a thermal imager. A thermal imager will be made available for those not owning one yet.**
